Panoramic mirror and pedestrian awareness light

MR14/16/16N/16HD/20/20HD/25

Requirement

Reach trucks are often used in areas that may have assembly line workers and can operate in busy pedestrian areas.

Solution

The panoramic mirror offers improved visibility on both sides of the truck and the Pedestrian Awareness Light (PAL) helps to increase awareness reducing the number of accidents within the warehouse. Panoramic mirror and PAL are both mounted on the overhead guard.

Control

The pedestrian awareness light automatically turns on when the operator drives in forward direction.
